SUBJECT INDEX

Acetylacetone
the photodimerization of acetylacetone, 303
Aerosols
fluorescence from laser excitation of H_2SO_4 aerosols produced by the gas reaction of SO_3 and H_2O, 255
Alkylaromatic compounds
photo-oxidation of alkylaromatic compounds by a catalytic system generated from a platinum dithiolene-like complex, 327
p-Aminobenzoic acid
pH effects on *p*-aminobenzoic acid photosensitized dimer formation from the free thymine base, 337
2-Aminopyridine
photochemistry Part XI. Search for luminescent dyes for solar collectors: effect of solvent and pH on the spectral characteristics of Schiff's bases derived from *ortho*-substituted benzaldehyde and 2-aminopyridine, 469
Anthracene
fluorescence of anthracene in frozen aqueous micellar solutions, 157
the influence of excitation energy migration on excitation energy transfer in polystyrene solutions, 321
Anthraquinones
triplet excited states and semiquinone radicals of 1,4-disubstituted anthraquinones, 373
9-Anthrylazomethines
photophysics and reversible photochemistry of 9-anthrylazomethines, 123
Arenediazonium salts
optical spectroscopy of the aryl cation, the intermediate in the decomposition of arenediazonium salts, 367
Aroyl xanthates
laser flash photolysis studies of aroyl xanthates and carboxylic dithiocarbamic anhydrides, 421
Aryl cation
optical spectroscopy of the aryl cation, the intermediate in the decomposition of arenediazonium salts, 367
Autoradioluminescence
the autoradioluminescence of uranyl salts. A new luminescence emission standard for 500 - 600 nm, 285
Azide
mixed-ligand palladium(II) and platinum(II) complexes of α-diimine and azide as photosensitizers of $^1O_2$ production, 83

Benzaldehyde
photochemistry Part XI. Search for luminescent dyes for solar collectors: effect of solvent and pH on the spectral characteristics of Schiff's bases derived from *ortho*-substituted benzaldehyde and 2-aminopyridine, 469
Bichromophores
photophysics of photoconducting polymers with pendant bichromophores II: electron and energy transfer photoprocesses in several carbazole–fluorene donor–acceptor bichromophoric systems, 165
Bioluminescence
chemiluminescence, 343
Borate radical
reactions of the borate radical with *para*-substituted benzoic acids (photo-kolbe reaction), 447

Carbazole–fluorene
photophysics of photoconducting polymers with pendant bichromophores II: electron and energy transfer photoprocesses in several carbazole–fluorene donor–acceptor bichromophoric systems, 165
Carboxylic dithiocarbamic anhydrides
laser flash photolysis studies of aroyl xanthates and carboxylic dithiocarbamic anhydrides, 421
Catalysis
catalysis of water photolysis by trichlorocuprate ions, 281

© Elsevier Sequoia/Printed in The Netherlands

Cation radicals
absorption and emission spectra of phenylalkene cation radicals in perfluorocarbon polymer film at 77 K, 193
Chemiluminescence
chemiluminescence, 343
CIDNP spectroscopy
evidence for singlet state β cleavage in the photoreaction of α-(2,6-dimethoxyphenoxy)-acetophenone inferred from time-resolved CIDNP spectroscopy, 435
β-Cleavage
evidence for singlet state β cleavage in the photoreaction of α-(2,6-dimethoxyphenoxy)-acetophenone inferred from time-resolved CIDNP spectroscopy, 435
β-Cleavage processes
MINDO/3 configuration interaction studies of β-cleavage processes in organic photochemistry, 213
Configuration interaction
MINDO/3 configuration interaction studies of α-cleavage processes in organic photochemistry, 213
Coordination numbers
radiationless deactivation of the dysprosium $^4F_{9/2}$ excited state by O—H and O—D oscillators as a probe for coordination numbers and ligation, 363
Cyclodextrin
effect of inclusion of cyclodextrin on excited state proton transfer: carbazole-γ-cyclodextrin, 199

Decomposition
dynamics of the SiF_4-sensitized decomposition of PH_3 by a pulsed CO_2 tea laser, 347
optical spectroscopy of the aryl cation, the intermediate in the decomposition of arenediazonium salts, 367
Deconvolution
the application of a simple deconvolution method to the analysis of stretched exponential fluorescence decay functions, 27
Dicyclohexylsulphide
uranium(V) as an intermediate in the photochemical reduction of the uranyl ion with dicyclohexylsulphide, 65
α-Diimine
mixed-ligand palladium(II) and platinum(II) complexes of α-diimine and azide as photosensitizers of $^1O_2$ production, 83
1,3-Diketonates
photochemical properties of 1,3-diketonate transition metal chelates, 1
Dimethylfumarate
mechanistic studies on the [2 + 2] photocycloaddition reaction of khellin, 457
α-(2,6-Dimethoxyphenoxy)-acetophone
evidence for singlet state β cleavage in the photoreaction of α-(2,6-dimethoxyphenoxy)-acetophenone inferred from time-resolved CIDNP spectroscopy, 435
Dipole–dipole interaction
precursor of charge carrier photogeneration in a sensitized organic photoconductor studied using fluorescence quenching, 179
Dithiolene
photo-oxidation of alkylaromatic compounds by a catalytic system generated from a platinum dithiolene-like complex, 327
Dysprosium
radiationless deactivation of the dysprosium $^4F_{9/2}$ excited state by O—H and O—D oscillators as a probe for coordination numbers and ligation, 363

Electron transfer
oxidative quenching of excited Ru(bpy)$_3^{2+}$ with $S_2O_8^{2-}$ at various pH and external magnetic field values, 271
photo-oxidation of alkylaromatic compounds by a catalytic system generated from a platinum dithiolene-like complex, 327
Eosine
photoinduced interaction between eosine and viologen, 47
Escape efficiency
oxidative quenching of excited Ru(bpy)$_3^{2+}$ with $S_2O_8^{2-}$ at various pH and external magnetic field values, 271
(ESR) Spectroscopy
optical spectroscopy of the aryl cation,

the intermediate in the decomposition of arenediazonium salts, 367
Excitation energy
the influence of excitation energy migration on excitation energy transfer in polystyrene solutions, 321

Flash photolysis
laser flash photolysis of Bis[tricarbonyl(cyclopentadienyl)tungsten] under visible irradiation, 69
laser flash photolysis studies of aroyl xanthates and carboxylic dithiocarbamic anhydrides, 421
mechanism of photochromic transformations of peri-acyloxy-9, 10- and 1,4-anthraquinone derivatives, 137
triplet excited states and semiquinone radicals of 1,4-disubstituted anthraquinones, 373
Fluorescence
fluorescence from laser excitation of H_2SO_4 aerosols produced by the gas reaction of SO_3 and H_2O, 255
fluorescence of anthracene in frozen aqueous micellar solutions, 157
fluorescence spectra and decays of malvidin 3,5-diglucoside in aqueous solutions, 407
precursor of charge carrier photogeneration in a sensitized organic photoconductor studied using fluorescence quenching, 179
some aspects of steady state and time-resolved fluorescence of tyrosine and related compounds, 389
the application of a simple deconvolution method to the analysis of stretched exponential fluorescence decay functions, 27
Free radical chain
photochemistry of $CO–H_2$ mixtures irradiated at 193.3 nm, 235
2-Furoic acid
oxidation of 2-furoic acid via singlet oxygen generated photochemically, 91

Iodonium salt
excited states of ketones as electron donors — ketone–iodonium salt systems as photoinitiators for radical polymerization, 111
Iron(III) oxalate complexes
the UV spectra of $Fe^{3+}OX_nH_m^+$ complexes in aqueous acidic solutions ($OX = C_2O_4^{2-}$, $n = 1 - 3$, $m = 0 - 1$), 39

Ketones
excited states of ketones as electron donors — ketone–iodonium salt systems as photoinitiators for radical polymerization, 111
MINDO/3 configuration interaction studies of α-cleavage processes in organic photochemistry, 213
Khellin
mechanistic studies on the [2 + 2] photocycloaddition reaction of khellin, 457
Kinetics
kinetics of the photochemical reactions of gas mixtures of methane and water and the effects of added oxygen, 241

Laser photon field
dynamics of the SiF_4-sensitized decomposition of PH_3 by a pulsed CO_2 tea laser, 347
Laser photons
fluorescence from laser excitation of H_2SO_4 aerosols produced by the gas reaction of SO_3 and H_2O, 255
Ligation
radiationless deactivation of the dysprosium $^4F_{9/2}$ excited state by O—H and O—D oscillators as a probe for coordination numbers and ligation, 363
Luminescent dyes
photochemistry Part XI. Search for luminescent dyes for solar collectors: effect of solvent and pH on the spectral characteristics of Schiff's bases derived from *ortho*-substituted benzaldehyde and 2-aminopyridine, 469

Magnetic fields
oxidative quenching of excited $Ru(bpy)_3^{2+}$ with $S_2O_8^{2-}$ at various pH and external magnetic field values, 271
Malvidin 3,5-diglucoside
fluorescence spectra and decays of malvidin 3,5-diglucoside in aqueous solutions, 407

Metal carbonyl dimers
laser flash photolysis of bis[tricarbonyl(cyclopentadienyl)tungsten] under visible irradiation, 69
Methane
kinetics of the photochemical reactions of gas mixtures of methane and water and the effects of added oxygen, 241
Methylenecycloproparenes
methylenecycloproparenes: efficient fluorescence and lasing of dimethylaminophenyl derivatives, 205
Microcrystals
a study of the photophysical properties of various triaryl-2-pyrazolines in solution and microcrystalline form, 309

Optical spectroscopy
optical spectroscopy of the aryl cation, the intermediate in the decomposition of arenediazonium salts, 367
Organic photoconductor
precursor of charge carrier photogeneration in a sensitized organic photoconductor studied using fluorescence quenching, 179
Oscillators
radiationless deactivation of the dysprosium $^4F_{9/2}$ excited state by O—H and O—D oscillators as a probe for coordination numbers and ligation, 363
Oxidation
oxidation of 2-furoic acid via singlet oxygen generated photochemically, 91
water photolysis via reversible oxidation and reduction between MnO_2 and MnO_4^{2-}, 43
Oxidative quenching
oxidative quenching of excited Ru(bpy)$_3^{2+}$ with $S_2O_8^{2-}$ at various pH and external magnetic field values, 271
Oxygen
kinetics of the photochemical reactions of gas mixtures of methane and water and the effects of added oxygen, 241

Palladium(II)
mixed-ligand palladium(II) and platinum(II) complexes of α-diimine and azide as photosensitizers of $^1O_2$ production, 83
Photo-oxidation
mixed-ligand palladium(II) and platinum(II) complexes of α-diimine and azide as photosensitizers of $^1O_2$ production, 83
photo-oxidation of alkylaromatic compounds by a catalytic system generated from a platinum dithiolene-like complex, 327
Photocatalysis
oxidation of 2-furoic acid via singlet oxygen generated photochemically, 91
photochemical properties of 1,3-diketonate transition metal chelates, 1
Photochemical isomerization
mechanism of photochromic transformations of peri-acyloxy-9, 10- and 1,4-anthraquinone derivatives, 137
Photochemical reduction
uranium(V) as an intermediate in the photochemical reduction of the uranyl ion with dicyclohexylsulphide, 65
Photochromic transformations
mechanism of photochromic transformations of peri-acyloxy-9, 10- and 1,4-anthraquinone derivatives, 137
Photocycloaddition
mechanistic studies on the [2 + 2] photocycloaddition reaction of khellin, 457
Photodimerization
the photodimerization of acetylacetone, 303
Photoexcitation
the 185 nm photolysis of 1,4-dioxan in aqueous solution in the presence of N_2O:N_2 formation via dioxan photoionization or photoexcitation?, 97
Photoinitiators
excited states of ketones as electron donors — ketone–iodonium salt systems as photoinitiators for radical polymerization, 111
Photoionization
the 185 nm photolysis of 1,4-dioxan in aqueous solution in the presence of N_2O:N_2 formation via dioxan photoionization or photoexcitation?, 97

Photoisomerization
photophysics and reversible photochemistry of 9-anthrylazomethines, 123
Photolysis
a study of the photophysical properties of various triaryl-2-pyrazolines in solution and microcrystalline form, 309
catalysis of water photolysis by trichlorocuprate ions, 281
kinetics of the photochemical reactions of gas mixtures of methane and water and the effects of added oxygen, 241
the 185 nm photolysis of 1,4-dioxan in aqueous solution in the presence of N_2O:N_2 formation via dioxan photoionization or photoexcitation?, 97
Photophysics
photophysics and reversible photochemistry of 9-anthrylazomethines, 123
photophysics of photoconducting polymers with pendant bichromophores II: electron and energy transfer photoprocesses in several carbazole–fluorene donor–acceptor bichromophoric systems, 165
triplet excited states and semiquinone radicals of 1,4-disubstituted anthraquinones, 373
Photosensitizers
mixed-ligand palladium(II) and platinum(II) complexes of α-diimine and azide as photosensitizers of $^1O_2$ production, 83
Platinum(II)
mixed-ligand palladium(II) and platinum(II) complexes of α-diimine and azide as photosensitizers of $^1O_2$ production, 83
Polymer film
absorption and emission spectra of phenylalkene cation radicals in perfluorocarbon polymer film at 77 K, 193
photophysical behaviour of zinc tetraphenylporphyrins in solutions and polymer films, 55
Polystyrene
the influence of excitation energy migration on excitation energy transfer in polystyrene solutions, 321
Proton transfer
effect of inclusion of cyclodextrin on excited state proton transfer: carbazole-γ-cyclodextrin, 199

Radicals
triplet excited states and semiquinone radicals of 1,4-disubstituted anthraquinones, 373
Reduction
water photolysis via reversible oxidation and reduction between MnO_2 and MnO_4^{2-}, 43

Schiff's bases
photochemistry Part XI. Search for luminescent dyes for solar collectors: effect of solvent and pH on the spectral characteristics of Schiff's bases derived from *ortho*-substituted benzaldehyde and 2-aminopyridine, 469
Solar collectors
photochemistry Part XI. Search for luminescent dyes for solar collectors: effect of solvent and pH on the spectral characteristics of Schiff's bases derived from *ortho*-substituted benzaldehyde and 2-aminopyridine, 469
Spectrophotometry
reactions of the borate radical with *para*-substituted benzoic acids (photo-kolbe reaction), 447
Sunscreen constituents
pH effects on *p*-aminobenzoic acid photosensitized dimer formation from the free thymine base, 337

Thiones
MINDO/3 configuration interaction studies of β-cleavage processes in organic photochemistry, 213
Thymine
pH effects on *p*-aminobenzoic acid photosensitized dimer formation from the free thymine base, 337
Triaryl-2-pyrazolines
a study of the photophysical properties of various triaryl-2-pyrazolines in solution and microcrystalline form, 309
Trichlorocuprate
catalysis of water photolysis by trichlorocuprate ions, 281

Tyrosine
some aspects of steady state and time-resolved fluorescence of tyrosine and related compounds, 389

Uranium(V)
uranium(V) as an intermediate in the photochemical reduction of the uranyl ion with dicyciohexyl-sulphide, 65
Uranyl salts
the autoradioluminescence of uranyl salts. A new luminescence emission standard for 500 - 600 nm, 285

Viologen
photoinduced interaction between eosine and viologen, 47

Water
kinetics of the photochemical reactions of gas mixtures of methane and water and the effects of added oxygen, 241
Water photolysis
water photolysis via reversible oxidation and reduction between MnO_2 and MnO_4^{2-}, 43

X-ray analysis
the photodimerization of acetyl-acetone, 303

Zinc tetraphenylporphyrin
photophysical behaviour of zinc tetraphenylporphyrins in solutions and polymer films, 55
